

How often do you face issues with the current key system (e.g., key loss, gate code failures)?

7 responses

How inconvenient is it to carry physical keys every day?

7 responses

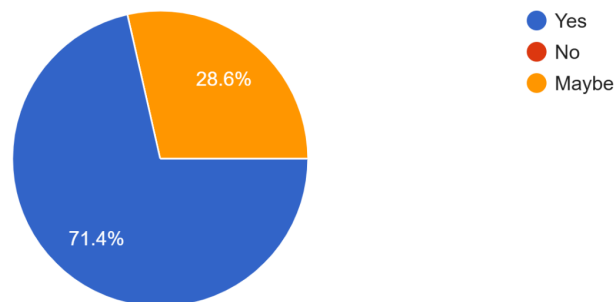

What is the most common issue you face with the current access system?

7 responses

code doesn't work all the time
When i reach at my gate i have to find the key, in which pocket or bag i put it
if i lost i my keys i have to pay for entire apartment keys key
Carrying keys
It not fully digital
Sometimes forgetting to take the key while going out, have to rely on someone else to get in the house.
Always need to carry keys, need to check for keys as it's common to lose keys

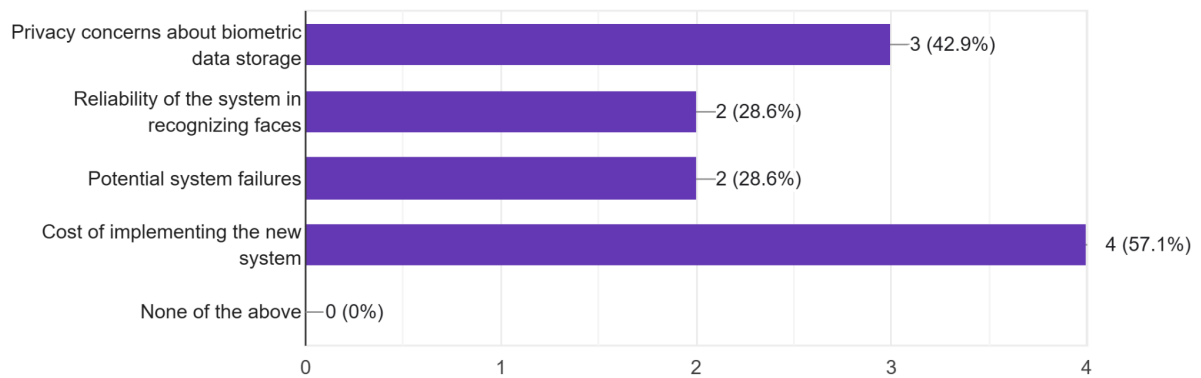

Would you consider replacing the key system with a facial recognition system?

7 responses

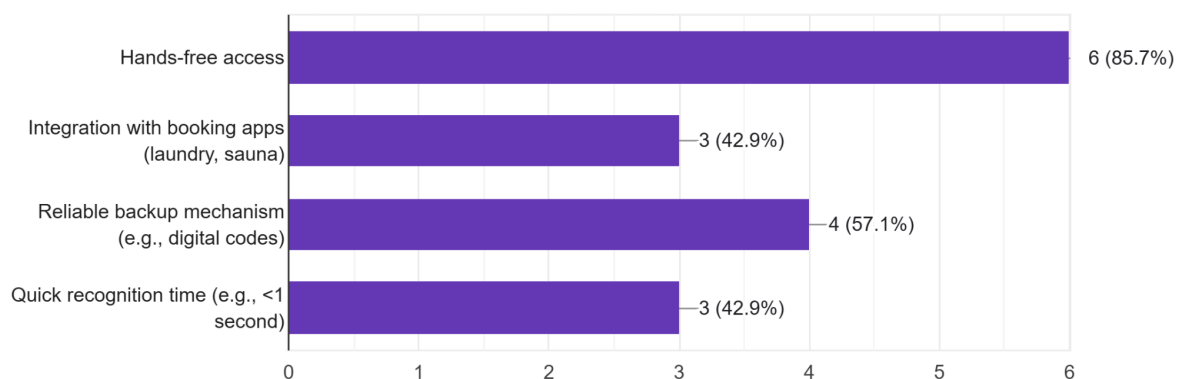

What are your concerns about adopting a biometric (facial recognition) system?

7 responses

7 responses

Would you like the system to integrate multiple services (e.g., access control and booking features)?

7 responses

How secure would you feel using a facial recognition system for building access?

7 responses

Do you have any suggestions or additional concerns about improving the building's access system?

No

Key less access would be a good choice and its convenient

No

NFC tag

Should have some digital verification system

The system should be hassle free.

Make sure there's good backup system in case of system failure
